

SUPER SIDE LIGHT FIBER OPTIC CABLE

**CONTACT US
NOW!**

Experience the brilliance of fiber optics like never before with Poly Optics' Super Side Light - brighter, flexible, and energy-efficient.

Forget what you previously thought fiber optic lighting could achieve because now fiber optics are brighter than ever before! Poly Optics has created a solid core fiber that emits up to three times more light than any existing solid core side light fiber on the market.

The possibilities for using a flexible, heat-free and energy efficient fiber optic cable this dazzling are endless! Super Side Light is specifically designed to be lit with LEDs which means conventional light drivers are not required.

Available in a range of diameters:

- 5.5mm
- 7.0mm
- 9.0mm
